

What is claimed is:

[Claim 1] 1. The device is a unique way to extract liquid out of a pouch.

[Claim 2] 2. The device is incorporated into the inner pouch not visible on the exterior.

[Claim 3]

3. The device is specifically designed to be efficient in extracting liquids from the pouch.

[Claim 4] 4. The device is designed with a snap-on/zip seal which once active, creates one or more solid spout/straw/opening to extract the liquid from the pouch.

[Claim 5] 4. The device can be designed with various sizes and incorporated into various pouches.

[Claim 6] 5. The device is designed to be large enough and tightly incorporated into the pouch to prevent accidental ingestion from children.
